IDENTIFIERS ACT Tests

ABSTRACT

The study is a simple statistical analysis of the ACT scores of the 1974-75 Louisiana State University-Baton Rouge graduates. Graduate students awarded advanced degrees are not included. For each college and field of study and for each of five ACT tests, these data are given: number of students, mean, middle two-thirds; range, standard deviation, and standard error. Data are arrayed in tables, with some additional narrative analysis. (MSE)

ACKNOWLEDGMENTS

The author acknowledges his debt to Dr. James W. Firnberg, Coordinator, Institutional Research, and Dr. C. Robert Blackmon, Director, Bureau of Educational Materials and Research, for their guidance and assistance in collecting, analyzing, and presenting this data. Thanks are extended to them, and to other members of their staffs who made this study possible. The support of Dean Vincent E. Cangelosi and his Junior Division staff is appreciated also.

ABOUT THE AUTHOR

WALTER L. GARNER, JR., is Supervisor of Guidance for the Louisiana State University Laboratory School. He earned a B.S. in Education (1955) and an M.Ed. in Counseling and Guidance (1968) from LSU. He has completed most of the academic requirements for his Doctorate. Mr. Garner is a veteran of 22 years in various branches of the armed forces where he rose through the enlisted ranks to Lt. Colonel. He is a graduate of the United States Air Force Air University's Command and Staff College and Professional Personnel Management School, and he has had extensive experience in technical training, educational, and personnel management assignments.

Louisiana State University adheres to the principle of equal educational and employment opportunity without regard to race, sex, color, creed, or national origin. The policy extends to all programs and activities supported by the University.

INTRODUCTION

A great profusion of ACT data is available on incoming college freshmen. Locally, Louisiana State University provides such ACT data for internal and external uses. From that data and various experiences in following students through their curricula at LSU, counselors and administrators have formed many assumptions about the ACT scores necessary to successfully complete LSU Baccalaureate degree programs. In fact, however, relatively little empirical ACT data is available on LSU students who have succeeded in their quest for an LSU degree.

With LSU's open admissions policy, ACT data on graduating LSU seniors might be critical for providing proper counsel to present and future LSU students. In colleges and universities with selective admissions policies, it might be assumed that admission as a freshman implies a reasonable opportunity for graduation. Under those circumstances the emphasis may properly be on the ACT norms of incoming freshmen. With an open admissions policy, however, a reasonable opportunity for graduation cannot be assumed. Under these circumstances, the more important reference becomes the ACT norms for those who were successful in obtaining their Baccalaureate degrees.

The ACT purports to provide objective measurements of academic abilities necessary for success in college. Few doubt that other types of abilities may also be necessary--and in some curricula may be of primary importance--but the ACT does provide valuable guides for estimating one's academic potential in the college enviroment. However, parameters of past successful performance are essential for estimating chances for success in the future. This study is hopefully a first step in obtaining that data.

THE STUDY

This study is a simple statistical analysis of the ACT scores of the 1974-75 Louisiana State University--Baton Rouge graduates. The study includes all graduates who were awarded the Baccalaureate degree at the ends of the 1974 Summer Term and the 1974-75 Fall and Spring Semesters. The study does not include graduate students who were awarded advanced degrees.

COMPILING THE DATA

With the assistance of the LSU Office of Institutional Research, LSU-BR graduates from the 1974 Summer Term and 1974-75 Fall and Spring Semesters were identified. Of the 2,879 LSU-BR students who were awarded the Baccalaureate degree during that period, 1,701 (59.1%) of them had ACT scores on the computer file.

These 1,701 data cards were run through a standard computer program. This sorted them by college and by curriculum and computed for each category the ACT mean, standard deviation, minimum and maximum scores, and standard error of the mean. It also computed this same data for the total sample.

In preparing the tables attached hereto, an additional score range of from one standard deviation below the mean to one standard deviation above the mean was computed and displayed. This range, of course, includes the middle 68% of each sample and is intended to provide users with a score range for the "more typical" graduates in each category. For example, counselors can advise that only one out of each six graduates would normally fall below the lower score in the "Middle 2/3" score range shown.

CONCLUSIONS

The most common assumption and most obvious conclusion is that ACT mean scores of graduating LSU seniors are higher than ACT mean scores of entering LSU freshmen. Assuming that most of the 1974-75 graduates were entering freshmen in 1971-72, the change in ACT mean scores for this class between admission and graduation was:

TEST	1971-72 FRESHMEN	1974-75 GRADUATES	DIFFERENCE
ACT-COMP	20.7	22.7	+ 2.0
ACT-ENG	19.6	21.3	+ 1.7
ACT-MATH	21.2	23.6	+ 2.4
ACT-SS	19.8	23.5	+ 3.7
ACT-NS	21.8	22.1	+ 0.3

A second assumption, the conclusion that graduates of different curricula--or different colleges--reflect different ACT profiles is not so obvious. In the sense that some curricula or colleges graduate students who have generally higher ACT mean scores than other curricula or colleges, the difference appears obvious. But, in the sense that graduates from some curricula or colleges can be distinguished from graduates of other curricula or colleges by the different profiles formed by graphing their various ACT mean scores, the differences are often obscure and questionable. Some graphs appear distinctively different from others, but many--perhaps most--appear relatively flat and indistinguishable. Further research is needed to find if there are meaningful guides for counselors in this assumption.

A third assumption, that persons with low ACT scores cannot successfully complete a degree program at LSU, is also questionable. Most counselors would have serious doubts about the chances for graduation of those graduates in

this study who had ACT-COMP scores more than two standard deviations below the mean. A few of these scores were possibly the result of test error in that these individuals had one or two extremely low test scores, which when combined with two or three average scores resulted in a low composite score. Most, however, showed relatively flat profiles on all ACT tests, indicating serious academic weaknesses in each area tested. Possibilities still exist, of course, that any of these scores could be low because of test error, or psychological or physical abnormality on the part of the individual at the time of testing; or the individual could have increased his academic skills significantly between admission and graduation; or LSU could have simply graduated a student with questionable academic skills. It appears, however, that poor academic skills as measured by the ACT can be overcome, or at least offset, by other important skills or talents. Graduates in this study with low ACT-COMP scores came from all but one of the colleges on the LSU-BR campus. The distribution of these low scores was:

TEST	SCORE	FREQUENCY	GRADUATED FROM
ACT-COMP	14	23	7 different colleges
	13	8	4 different colleges
	12	6	5 different colleges
	11	7	5 different colleges
	10	3	3 different colleges
		47	8 different colleges

RECOMMENDATIONS

The attached tables provide parameters of academic skills, as measured by the ACT, found in LSU-BR graduates. They are, therefore, a potentially valuable reference tool for counselors of present and future LSU students, and they should be made available to those counselors.
